

RaynePure⁺

Reverse Osmosis Drinking Water System Plus[®]

The most cost-effective way to provide a continuous supply of sparkling clean water without the bottle for:

- Exceptional coffee, tea & juice
- Delicious soups, oatmeal & sauces
- Cleaner, clearer ice cubes
- Great for humidifiers, steam irons, plants, pets and aquariums

Ensuring the everyday water we drink is safe and natural is as important as the water itself. Unfortunately, not all water we use from our taps is the pure, clean drinking water our bodies desire.

The RaynePure Plus[®] Reverse Osmosis Drinking Water System effectively reduces harmful contaminants*, turning tap water into convenient, fresh, clean water at your own separate faucet.

"for the water in your life"

Typical Installation of the RaynePure Plus[®] Reverse Osmosis Drinking Water System.

Tested and-Certified by NSF International against ANSI/NSF Standard 58 for the reduction of the claims specified on the Performance Data Sheet.

RaynePure Plus[®] Drinking Water System

Will reduce the following contaminants*:

- Arsenic • Copper • Fluoride • Barium • Selenium
- Radium 226 • Radium 228 • Nitrate • Nitrite • Lead
- Hexavalent Chromium • Trivalent Chromium • Cadmium
- Total Dissolved Solids (T.D.S.)

Microbiological Contaminant* Reduction

- Cyst • Cryptosporidium • Giardia • Entamoeba

These substances may not be present in your water supply

***Effectively reduces harmful contaminants!**

*For specific percentages of contaminant reduction, consult the performance data sheet. **Do not use with water that is microbiologically unsafe or of unknown quality, without adequate disinfection before or after the system.** This system shall only be used for arsenic reduction on chlorinated water supplies containing detectable residual free chlorine at the system inlet. Systems certified for cyst reduction may be used on disinfected water that may contain filterable cysts.
